📞 6301770630 | ✉ varkalanagendar777@gmail.com | 🌐 nagendar-varkala | 🕒 Nagendar23 | 📍 Hyderabad, India

## PROFESSIONAL SUMMARY

Full Stack Software Engineer with production experience building scalable MERN and Next.js applications. Delivered measurable results — 35% API latency reduction, 40% increase in event registrations, and sub-200ms real-time video latency. Proficient in TypeScript, REST API design, JWT authentication, and cloud deployment (AWS, Vercel, Docker). Passionate about end-to-end ownership, clean code, and shipping user-facing features with real impact.

## EXPERIENCE Internship

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                  |
