PROFESSIONAL SUMMARY

Analytical and detail-oriented Data Analyst Intern with a solid foundation in Artificial Intelligence & Data Science and hands-on experience transforming raw datasets into actionable business insights. Proficient in Python (Pandas, NumPy), SQL, and advanced Excel for comprehensive data cleaning, data transformation, and exploratory data analysis (EDA). Skilled in utilizing Power BI to build interactive dashboards, define complex DAX measures, and establish critical KPI tracking frameworks. Proven ability to optimize database queries and leverage platform analytics to drive operational efficiency and support data-driven decision-making.

TECHNICAL SKILLS

Programming & Analysis: Python, NumPy, Pandas, JavaScript, TypeScript

Data Visualization: Power BI, Matplotlib, Seaborn

Databases: SQL (MySQL, PostgreSQL), MongoDB

Spreadsheet & Reporting: Microsoft Excel (Pivot Tables, Pivot Charts, Advanced Formulas)

Tools & Platforms: Git, GitHub, Firebase Analytics, Postman

EXPERIENCE

Data & Full Stack Software Engineer Intern

Oct. 2025 – Mar. 2026

Innорize Enterprises Private Limited

Hyderabad, India

- Optimized MongoDB database queries and indexing strategies, reducing data retrieval latency by 35% and improving underlying data pipeline efficiency.
- Integrated Firebase Analytics to track user behavior metrics, building automated reporting workflows to monitor platform engagement and security anomalies.
- Cleaned and structured large-scale production datasets during a major codebase migration, eliminating data type runtime errors and ensuring high data integrity.
- Collaborated in an agile team environment to translate user activity data into performance insights and visual metrics for senior leadership.

DATA ANALYTICS PROJECTS

Amazon Stock Analysis Dashboard | *Microsoft Excel*

- Developed an interactive Excel dashboard to analyze historical Amazon stock data, enabling real-time trend analysis and financial data insights.
- Cleaned and preprocessed raw financial datasets, utilizing advanced formulas, Pivot Tables, and Pivot Charts to establish key performance indicators (KPIs) for market performance.
- Generated actionable business intelligence reports by analyzing moving averages, price volatility, and trading volume trends to identify market patterns.

Coffee Shop Sales Dashboard | *Microsoft Excel*

- Engineered a comprehensive sales analytics dashboard in Microsoft Excel to track store performance, product profitability, and customer behavior patterns.
- Processed and transformed transactional data using advanced Excel capabilities to isolate peak sales hours, high-performing product categories, and operational bottlenecks.
- Provided data-driven operational recommendations and decision-support insights that identified underperforming regions and revenue growth opportunities.

Car Sales Dashboard | *Power BI, Power Query, DAX*

- Built an executive-level Power BI dashboard utilizing Power Query for robust data transformation and advanced DAX measures for dynamic time-intelligence analysis (YTD, MTD, YOY).
- Designed an intuitive data model to evaluate regional sales performance, tracking key sales metrics across multiple geographic and demographic dimensions.
- Streamlined business performance reporting by implementing automated data refreshes and interactive visualizations, optimizing data delivery for stakeholder decision-making.

EDUCATION

Sri Indu College of Engineering & Technology

Hyderabad, India

B.Tech in Artificial Intelligence & Data Science | GPA: 7.86/10

2022 – 2026

CERTIFICATIONS & LEADERSHIP

Certifications: Python Programming – GeeksforGeeks (Sep 2025) | JavaScript Essentials – Coursera (2024)

Leadership: Led cross-functional teams in multiple hackathons, managing data solution design, metric tracking, and on-time project delivery.
