PROFESSIONAL SUMMARY

Backend Developer with production experience building secure, scalable REST APIs and real-time server-side systems using Node.js and Express.js. Reduced API latency by ~35% through MongoDB query optimization and indexing in a live production environment. Skilled in authentication systems (JWT, Passport.js, RBAC), database design, real-time architecture with Socket.io, and end-to-end API security.

EXPERIENCE

Full Stack Software Engineer Intern <i>Innorize Enterprises Private Limited</i>	Oct 2025 – March 2026 <i>Hyderabad, India</i>
- Optimized production REST API performance by ~35% through MongoDB query profiling, strategic indexing, and eliminating N+1 query patterns — directly reducing server response time under peak load - Migrated the entire backend codebase from JavaScript to TypeScript, enforcing strict type safety across all API controllers, middleware, and Mongoose models — reducing runtime errors in production - Engineered an abusive-content filtering system at the API layer with input sanitization; collaborated in agile sprints with API design reviews and on-time delivery alongside a senior engineering team	

PROJECTS

VideoMeetZ <i>Node.js, Express.js 5, MongoDB, JWT, bcrypt, Socket.io, REST APIs</i>	2025
- Engineered a dual-layer backend on Node.js/Express 5 running versioned REST API routes (/api/v1/) and Socket.io real-time events simultaneously — implemented JWT + bcrypt authentication, environment-aware CORS, global error handling, and JWT-protected middleware across both HTTP and WebSocket layers - Architected a stateful server-side room management system handling real-time Socket.io events — room lifecycle, waiting room admission queue, host controls (admit/reject/kick), and in-meeting chat — with MVC-structured controllers separating User Auth from Socket Manager and meeting history persisted to MongoDB	
PDFEditZ <i>Node.js, Express.js, MongoDB, JWT, bcrypt, pdf-lib, multer, sharp, node-cron</i>	2026
- Engineered a document automation backend with 10+ REST API endpoints supporting file upload, PDF overlay, merge, split, page extraction, PDF to DOCX conversion, and signature/watermark injection via pdf-lib and sharp - Secured the platform with JWT + bcrypt authentication and per-user RBAC ensuring zero cross-user data exposure; deployed an automated node-cron file lifecycle pipeline to purge expired files from disk and MongoDB without manual intervention	
Airbnb Clone <i>Node.js, Express.js, MongoDB Atlas, Passport.js, Joi, Multer, Cloudinary</i>	2025
- Architected a full MVC-pattern backend with Passport.js Local Strategy for session-based authentication, encrypted session store (connect-mongo), and a custom middleware stack — isLoggedIn, isOwner, wrapAsync, and ExpressError — enforcing route-level authorization and centralized async error handling - Implemented Joi schema validation and input sanitization across all routes; engineered cascading delete logic for referential integrity, Cloudinary + Multer for cloud image storage, and MongoDB regex search for location/country/title filtering	

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python
Backend: Node.js, Express.js, REST API Design, API Versioning, Pagination, Filtering & Sorting, Centralized Error Handling
Validation: Joi, Zod, Express Validator, Input Sanitization
Auth & Security: JWT, bcrypt, Passport.js, OAuth 2.0, RBAC, CORS, Rate Limiting, Helmet, XSS & CSRF Protection
Databases: MongoDB (Atlas, Mongoose), MySQL, PostgreSQL, Firebase — Database Design, Indexing, Query Optimization
Real-Time: Socket.io, WebSockets, WebRTC Signaling File & Task Handling: Multer, Cloudinary, pdf-lib, sharp, node-cron
Testing: Jest Tools & DevOps: Git, GitHub, Docker, AWS (EC2, S3), CI/CD, Postman, Vercel, Render

EDUCATION

Sri Indu College of Engineering & Technology <i>B.Tech in Artificial Intelligence & Data Science</i> GPA: 7.74/10	Hyderabad, India 2022 – 2026
---	---------------------------------

CERTIFICATIONS & ACTIVITIES

Certifications: JavaScript Essentials – Coursera (2024) Python Programming – GeeksforGeeks (Sep 2025)
Open Source: Maintained 5+ backend-focused GitHub projects with MVC structure, documented APIs, and clean middleware architecture
Leadership: Led cross-functional teams in multiple hackathons — owned backend architecture decisions, task delegation, and on-time delivery

PROFESSIONAL SUMMARY

Analytical and detail-oriented Data Analyst Intern with a solid foundation in Artificial Intelligence & Data Science and hands-on experience transforming raw datasets into actionable business insights. Proficient in Python (Pandas, NumPy), SQL, and advanced Excel for comprehensive data cleaning, data transformation, and exploratory data analysis (EDA). Skilled in utilizing Power BI to build interactive dashboards, define complex DAX measures, and establish critical KPI tracking frameworks. Proven ability to optimize database queries and leverage platform analytics to drive operational efficiency and support data-driven decision-making.

TECHNICAL SKILLS

Programming & Analysis: Python, NumPy, Pandas, JavaScript, TypeScript

Data Visualization: Power BI, Matplotlib, Seaborn

Databases: SQL (MySQL, PostgreSQL), MongoDB

Spreadsheet & Reporting: Microsoft Excel (Pivot Tables, Pivot Charts, Advanced Formulas)

Tools & Platforms: Git, GitHub, Firebase Analytics, Postman

EXPERIENCE

Data & Full Stack Software Engineer Intern

Oct. 2025 – Mar. 2026

Innорize Enterprises Private Limited

Hyderabad, India

- Optimized MongoDB database queries and indexing strategies, reducing data retrieval latency by 35% and improving underlying data pipeline efficiency.
- Integrated Firebase Analytics to track user behavior metrics, building automated reporting workflows to monitor platform engagement and security anomalies.
- Cleaned and structured large-scale production datasets during a major codebase migration, eliminating data type runtime errors and ensuring high data integrity.
- Collaborated in an agile team environment to translate user activity data into performance insights and visual metrics for senior leadership.

DATA ANALYTICS PROJECTS

Amazon Stock Analysis Dashboard | *Microsoft Excel*

- Developed an interactive Excel dashboard to analyze historical Amazon stock data, enabling real-time trend analysis and financial data insights.
- Cleaned and preprocessed raw financial datasets, utilizing advanced formulas, Pivot Tables, and Pivot Charts to establish key performance indicators (KPIs) for market performance.
- Generated actionable business intelligence reports by analyzing moving averages, price volatility, and trading volume trends to identify market patterns.

Coffee Shop Sales Dashboard | *Microsoft Excel*

- Engineered a comprehensive sales analytics dashboard in Microsoft Excel to track store performance, product profitability, and customer behavior patterns.
- Processed and transformed transactional data using advanced Excel capabilities to isolate peak sales hours, high-performing product categories, and operational bottlenecks.
- Provided data-driven operational recommendations and decision-support insights that identified underperforming regions and revenue growth opportunities.

Car Sales Dashboard | *Power BI, Power Query, DAX*

- Built an executive-level Power BI dashboard utilizing Power Query for robust data transformation and advanced DAX measures for dynamic time-intelligence analysis (YTD, MTD, YOY).
- Designed an intuitive data model to evaluate regional sales performance, tracking key sales metrics across multiple geographic and demographic dimensions.
- Streamlined business performance reporting by implementing automated data refreshes and interactive visualizations, optimizing data delivery for stakeholder decision-making.

EDUCATION

Sri Indu College of Engineering & Technology

Hyderabad, India

B.Tech in Artificial Intelligence & Data Science | GPA: 7.86/10

2022 – 2026

CERTIFICATIONS & LEADERSHIP

Certifications: Python Programming – GeeksforGeeks (Sep 2025) | JavaScript Essentials – Coursera (2024)

Leadership: Led cross-functional teams in multiple hackathons, managing data solution design, metric tracking, and on-time project delivery.
